

The Power Of Real Life Learning

Students learn in a variety of different ways. The Prendiville Catholic College FLEXed pathway recognises this. We know it is possible for deep learning and achievement to take place without the traditional constraints of dedicated timetabled lessons. At PCC we have developed an Enterprise Learning Pathway to maximise the success of every student.

FLEXed is a totally flexible program unique to Prendiville Catholic College. This pathway caters for those students who desire a flexible learning environment and who respond well to an integrated approach to learning.

The FLEXed pathway is focused around the enterprise theme of Design and Technology. By merging academic and technical study with real world learning, this pathway offers a totally integrated program which is not restricted by the bounds of a traditional timetable. A unique feature of the pathway is the responsibility of running an onsite business. All student courses are connected to the business.

FLEXed is for students who are seeking to graduate from school with certified accreditation and will provide a rigorous understanding of business and enterprise that can lead to employment, further study or even a practical trade.

Pathway Design

This program will provide students with a flexible, open and integrated style environment and the opportunity to achieve their WACE and complete their secondary education at Prendiville Catholic College, graduating as a 'Prendivillian'.

A non-WACE FLEXed pathway is also available.

The program is facilitated by a mentor teacher. Students will work with the mentor teacher to scaffold the learning that best meets the needs of each student.

At a glance, the program:

- Is designed for active learners: students who like to put theory into practice and see something practical come out of their work.
- Will help students to develop skills in vocational literacy and numeracy.
- Gives students 'real life' work experiences in areas of interest.
- Enables students to move easily into TAFE, the workforce or even their own small business.

Application Process

Students must apply to enter the FLEXed program. Application forms can be forwarded to your counsellor on the day of your counselling session.

Year 11 Course Content

English (General)

Religious Education (General)

Certificate II in Business

Design: Dimensional Analysis (General)

Materials Design and Technology: Wood (General)
